

## d+ class B XLR series

### The new XLR and TRS line from d+series

The new series bring the highest quality and a cool designed in your sound system such as audio interface, speaker, mixer, effector, synthesizer and sound equipments.

About the product planning for the d+ series, we contemplated the best combination of materials and structure of cable for today' s music and situations. The outstanding features of d+ class B series is 18 AWG pure oxygen free copper makes powerful sound projection and reduce signal loss. The flat architecture of cable prevents the signal distortion by the interference of conductor spacing. In addition, the soft PVC outer and the stereo split cable' s structure have a high degree of usability for cable connection.

There is the next generation of audio transmit technology for producer, DJ, musician, engineer and everyone.
